

### **Student Final Deliverable Checklist:**

1. **Project proposal (based on the template)**
2. **A 2-page design document.**
3. **The Code:** A GitHub/GitLab repository with clear README instructions.
4. **The Analysis:** A report justifying design choices using **Özsu and Valduriez** theory.
5. **The Proof:** A screen-recording (3-5 mins) showing the system handling a specific dataset scenario (demonstrating the failure cases, e.g., "What happens when I kill Node B?").

Students should consider the grading categories.

Students **MUST** attend the final exam and present project work.

All materials must be submitted properly. The lecturer will provide the form for project submission.
